Dear elected representatives.

Please oppose HR 4026.

The effort by the lobbyist to stop XM instant traffic and weather, if they succeed it will be hazardous to the subscribers of XM radio service.

Many of us that subscribe are often on the road travelling long distances from state to state. The unique uninterrupted radio service provided by XM radio gives us the link to news and hazards that might be awaiting us on our travels. This early warning adds to the propobility of making it home safe and avoiding hazards or contributing to unidentified traffic and weather hazardous conditions.

Sincerely,

Adoni Poledicha
